

# THE AVK UK

## SERIES 01/79 SUPAPLUS™ SOCKET CONNECTIONS, WEDGE GATE VALVE *PERFECT FOR A QUICK INSTALLATION!*

NEW  
PRODUCT

The new **AVK Series 01/79 Resilient Seat Gate valve** with **integral tensile end load resistant adaptors** has design features that deliver ease of fitting, reduced overall cost, reduction in connections and reduced excavation size. All of which make this valve easier, quicker and cheaper to install.

### BENEFITS:

- No fused joints required – full tensile resistant mechanical joints with simple torque wrench required for installation.
- Less materials – no PE stub flange, bolt/gasket sets, no EF couplings required.
- Installation time significantly reduced - Less time spent in trench for installation, therefore reducing health and safety risks.
- Full AVK design and UK manufacture, supported with holiday free internal coating, WRAS approvals, BS 5163 and WIMES 8.09 compliant.
- Cost savings – reduction in time and materials result in a minimum of 20% installed cost saving.

AVK recommend that the Series 05 internal support bushes should always be used with polyethylene pipe systems.
