

POSITION INDICATOR FOR DONKIN SERIES 555 UPTO 300MM

555/881-001

Indicator, polycarbonate

The Donkin Position Indicator has been specially designed for use with the Series 555 valves to provide a simple and cost effective means of identifying whether the valve is in the open or closed position. It can be used both for above ground or underground installations.

When above ground the indication is given by a diagonal scale on the side which moves from right (open) to left (closed). When the valves are used underground the indicator can be viewed from above with a circular hole on the right indicating open and a slot on the left indicating closed.

Product description:

Donkin Position Indicator for Donkin gas valves. Service Conditions: Temperature range: -20°C to + 40°C Post Indicator

Features:

- Simple to fit.
- Vivid red indicator scale.
- Can be retrofitted to valves that are already installed.
- Reduces the need for double stocking of valves.
- Robust design.
- Corrosion resistant materials.
